FEATURES

- **Fast, Real Time Searches** – Delivers fast retrieval of property listings with real time MLS data. Real Time means no more outdated listing information, nor overnight data downloads.
Get only the listings you need for fast up-to-date information retrieval.
- **Your Portable MLS** – Put the Power of the MLS in the palm of your hand! Get up to 100 listings to view from with each search. View listings by price or MLS # of the first 100 matches with every wireless search.
- **Get property maps and driving directions** – Create and email property tour maps with turn-for-turn instructions and driving distances and times between

turns along the route.

PocketMLS automatically produces optimized tour routes. Set your own start and finish location and let PocketMLS give you the shortest driving route from A-to-B.

- **View multiple listing photos** – PocketMLS retrieves multiple listing photos for advance viewing. Email photos with listing information right to client.
- **Save Searches** – Create Saved Searches for common property types for easy retrieval and viewing later.

So you say you're the "Condo Queen." Great! Now save several condo types in your location hotspots to email those home showing visitors right from your phone.
- **Setup contacts** – add contacts directly into PocketMLS to setup saved searches and to email listings.
- **Setup MLS listing alerts** – by adding on the ListingAlert™, you can set email alerts for your clients from anywhere at anytime. Notifies you and your clients of new listing matches from your selected search criteria.
- **Calculate mortgage** – Inform clients of relative property expenses. Our mortgage calculator retrieves the listing price and delivers results right on your PDA.
